

Experienced C#/.NET developer

Location: Faraday Wharf, Birmingham, B4 4BB, UK

Salary: £36,000 - £48,000 per year depending on skills and experience, plus bonus and pension

Job type: Permanent, full time preferred, must be able to work in the UK

About the role

We are looking for brilliant software developers with at least 4 years of commercial experience in developing software applications in C# / .NET. You will work across our product range on areas including:

- data management using SQL back-end and web technologies;
- data exploration using graph views, spreadsheets, and other visualisations;
- mapping and handling of spatial data;
- user interaction design and user interface development;
- visualisation, modelling and statistical data analysis.

So why would you want to work for IGI? We are a team that values people over process, and works in a flexible, professional way in a friendly atmosphere. Our team is comprised of driven people who combine deep technical expertise with a collaborative, can-do approach.

As a member of our team, we encourage you to get involved in areas of the company that interest you. You will be given appropriate support and will be able to take part in steering our working practice. We offer a competitive salary with a company bonus scheme and we have a generous holiday allowance. We encourage personal and professional development through fortnightly “developer days” and will support your training and development needs.

Skills and requirements

Essential:

- Good team communication skills and strong desire to learn
- Demonstrable knowledge of software architecture, design patterns, dependency injection, unit testing, TDD, and mocking
- Full development lifecycle experience writing object-oriented software preferably with the Microsoft technology stack (C#, .NET) in Visual Studio
- Experience with source control (Mercurial / Git) and continuous integration

Of particular interest:

- Some experience of backend systems development (e.g. SQL relational databases)
- Experience of computer graphics and an interest in the visual display of data

Nice to have:

- Experience of using WPF and interaction design
- Use of Kanban and agile development methodologies, peer / code review experience
- Experience of build and support tools (e.g. PowerShell, TeamCity)
- An appreciation of mapping and geospatial data handling

About us

Established in 1983, IGI has grown to be the world's largest independently owned geochemical consultancy company, providing its expertise to oil industry companies around the world. The

company has built an international reputation for innovation in geochemistry project work, data compilation and software.

Our software team (comprising of 9 software developers, a product owner and a tester) is responsible for developing cutting-edge software to support the visualisation, interpretation and management of geochemical data, through a suite of integrated desktop and web products, which we intend to develop further for other application domains. Our current focus is on C#/.NET technologies, but we also work on web based (Javascript , PHP, MySQL) and Python based solutions.
